Roadmap for preparing your MAP paper

**Studienprojekt:** You examine a particular aspect of TEFL by observing lessons, testing, doing a survey, setting tasks & analysing task outcomes etc.

- Identify fields of interest (syllabi, TEFL, SLA, classes attended, etc.)
- Find/Choose a topic/field of interest
  - Criteria for a suitable topic:
    - Is it TEFL-specific (e.g. skills, ICC, etc.)? (E.g. examining the benefits of group work would be too general)
    - Is it observable? (E.g. whether students process a text bottom-up or top down is hard to observe)
    - Is its analysis realistic/feasible? (E.g. use of FL in pair work: technical realization of recordings? Permission of parents? Transcription of recordings?)
- Find out what is known about this topic in theory (read appr. 2-3 texts which deal with your topic, feed in the literature)
- Formulate a guiding question
- Choose a method (e.g. classroom observation, task analysis, learner/teacher interview)
- Choose/Develop a research instrument (e.g. questionnaire, observation grid with criteria for observation (for examples see Scrivener 2005: 382ff.), test, tasks, criteria for analysing a learner product)
- Analyse and interpret your collected data/learner product by getting back to your theoretical knowledge

**Moving from a field of interest to a guiding question (examples)**

</thead>
<tbody>
<tr>
<td>Speaking</td>
<td>E.g.: Focus on fluency, speaking time in the EFL class (DESI), Levelt’s model of speaking (1989), adapted models of speaking (Diehr/Frisch 2008); Wolff (2002); assessing speaking (Luoma 2004) etc.</td>
<td>E.g.: To what degree are learners able to speak productively? What opportunities are learners given for free oral production?</td>
<td>E.g.: Analysis of speaking tasks and task outcomes with the help of an observation sheet/audio recording</td>
<td>Transcription of a learner text. Collection of examples of free language use.</td>
</tr>
<tr>
<td>Teaching vocabulary</td>
<td>E.g.: Verbal and non-verbal techniques for communicating word meaning (Thaler 2012: 227f.); rich instruction (Nation 2001)</td>
<td>E.g. Is there rich instruction about aspects of word knowledge?</td>
<td>E.g.: Classroom observation with the help of an observation sheet for documenting methods used in the lesson</td>
<td>E.g.: Quantitative analysis: Which methods are used most often? Which aspects of word knowledge are especially fostered?</td>
</tr>
<tr>
<td>---------------------</td>
<td>--------------------------------------------------------------------------------------------------------------------------------</td>
<td>-----------------------------------------------------------------</td>
<td>-------------------------------------------------------------------------------------------------</td>
<td>-------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Task-based/task-supported language learning</td>
<td>E.g.: Focused vs. unfocused tasks (Ellis 2003); TSSL (Müller-Hartmann/Schocker-v. Ditfurth 2011); task demand and task support (Cameron 2001)</td>
<td>E.g.: Which kinds of tasks are used in the EFL classroom? How do learners make use of tasks?</td>
<td>Contrasting task-as-plan and task-in-action by comparing a lesson plan with a learner product</td>
<td>E.g.: Content analysis: Which aims were reached? Which aims were not reached? What could be possible reasons?</td>
</tr>
<tr>
<td>Language use in bilingual education</td>
<td>E.g.: Use of L1, L2 etc. in bilingual education, e.g. (Diehr/Schmelter 2012), Wolff (2012), Cummins’ distinction between BICS and CALP, etc.</td>
<td>E.g.: How are L1, L2 and FL employed? Or: In which situations are L1, L2, FL used? What is the function of language change/code-switching?</td>
<td>E.g. Classroom observation with the help of an observation sheet which documents different situations of code-switching</td>
<td>E.g.: Categorisation of identified code-switching situations</td>
</tr>
<tr>
<td>Teaching literature/ Picture books</td>
<td>E.g.: Literature/Picture books in the EFL class and development of competences, e.g. Diehr/Surkamp (2015), Alter/Frisch (2018) etc.</td>
<td>E.g.: How can the literary text/PB be used to develop - language competence - literary skills</td>
<td>E.g.: Analysis of the PB → Identification of its potential; Analysis of a learner text with the help of criteria</td>
<td>E.g.: Content analysis: Referring content of the learner text to a model of literary competence</td>
</tr>
</tbody>
</table>

How to document your findings
- Make an appendix. This should include:
  - your observation grids (empty & filled in), criteria of your analysis
  - your lesson plans
  - charts and table of quantitative findings
  - teaching materials you used
  - ...

Wuppertal, 17.04.2018

Prof. Dr. B. Diehr and the TEFL Team  Prof. Dr. Stefanie Frisch, Ralf Gießler, Dr. Annette Kroschewski
